Looking For

Desired Position: Full Stack Engineer

Desired Location: Guangzhou

Professional Strengths

Full Stack Engineer with 6 years of experience in full-stack development, proficient in Node.js, React, PostgreSQL, and adept at using CI/CD tools like Jenkins, Docker, and Kubernetes. Successfully led a team, implementing Scrum workflows for efficient project progress and delivering zero major bugs in releases. Passionate about enhancing user experience and continuously improving website functionality through collaborative cross-functional efforts.

Work Experience

The Knot Worldwide

Team Lead

2019.10 - 2024.03

- 1.Led development of thebump.com, managing projects, daily iterations, code deployment, and data maintenance.
- 2.Ensured timely sprint deliveries and zero major bugs in releases, improving site performance metrics.
- 3.Utilized full stack skills to optimize performance and monitor site, enhancing user experience.
- 4.Resolved technical issues promptly, contributing to continuous improvement of website functionality.
- 5.Collaborated with cross-functional teams to achieve measurable results in site performance and reliability.

Shanghai FirstGrid Network Technology Co., Ltd.

Node.js Engineer

2018.08 - 2019.09

- 1.Developed backend for Yijieyun website using Node.js, ensuring stable and bug-free external services.
- 2.Integrated frontend and backend systems, significantly enhancing user experience and data accuracy.
- 3.Created robust APIs, improving system performance and reliability.
- 4.Generated comprehensive data reports, aiding in strategic decision-making.
- 5.Maintained customer data integrity, preventing any data loss or bugs.

Project Experience

BabyNames

Team Lead

2019.10 - 2024.03

TheBump is a sub-brand of TKWW, providing parenting advice. BabyNames helps parents choose names for their newborns through tools like names by

gender/meaning, name details, name lists, top names, etc.

Responsibilities:

● Coding:

1. Iterative frontend and backend development, daily development, unit testing.
2. Migrated from Ruby to Node.js.
3. Built CI/CD processes using GitHub, Jenkins, Docker, Kubernetes, AWS.
4. Coordinated with the Spanish editors team, providing them with website content data reports, receiving their data, and updating the website.
5. Monitored project operations using New Relic and Honeybadger.
6. Monitored and optimized website SEO performance using PageSpeed Insights.
7. Monitored user behavior using Segment and FullStory.

● Project Management:

1. Followed the project's Scrum workflow, worked with PM to formulate each sprint's work plan.
2. Led each sprint's IPM.
3. Assigned tasks and tracked progress.
4. Responsible for each sprint's release tasks.

Achievement:

● Personal Growth:

I joined as a Software Engineer and quickly familiarized myself with tools like Docker and Kubernetes. Expanded skill set and knowledge base, promoted to Senior Software Engineer and eventually Team Lead.

● Project:

1. Improved project performance through refactoring and upgrades.
2. Increased user numbers by optimizing SEO, moving from third page to top three on Google's first page.
3. Enhanced user retention and ratings through multiple rebrandings.

Education

◆ ◆ ◆ ◆ ◆

Jiangxi University of Finance and Economics

Bachelor	Software Engineering	2014-2018
----------	----------------------	-----------

Participated in studio work under the guidance of a mentor, including financial data mining using Python, researching quantitative investment solutions, and writing tutorials for related courses.
